

Elementary Mathematics

Mission Statement

Math is a dynamic subject, affected by changes in technology and the demands of a modern economy. Mathematics education must be proactive to prepare students to be critical thinkers and problem solvers. Technology should be used as a tool in mathematics education to support and extend the curriculum. The standards are organized around the following areas: Number Sense, Computation, Algebra and Functions, Geometry, Measurement, Data Analysis and Probability, and Problem Solving. The following model provides a focus for each grade as it builds student skills and knowledge. Key topics, concepts, and skills are introduced early and reinforced and expanded from Kindergarten through Grade 6.
