

Northwestern Elementary Science Philosophy

Northwestern Elementary engages the student learner in the wonders and questions of science through a multifaceted approach. Sequential learning activities with hands-on application of science methods help students explore science outside on the school grounds, at field trip sites, and in the classroom. Our school annually participates in local, county, regional, and state wide competitions in Science Bowl, Science Fairs, and Lego Robotic Leagues. We seek to offer a successful and challenging science education to students of all ability levels. We value the extra effort that teachers must expend to maintain an excellent science program by working together and supporting one another. We update lessons with current events and new scientific discoveries. Northwestern Elementary is dedicated to maintaining its reputation for excellence in science education.
